

Ehnand Azucena

Full Stack Developer | Backend-Focused

Philippines (UTC +8) | Initao, Northern Mindanao 9022 | 09534678287 | ehnand.azucena00@gmail.com
[Portfolio](#) | [LinkedIn](#) | [GitHub](#)

Full Stack Developer with production experience building multi-tenant SaaS platforms, AI-powered applications, and government enterprise systems. Architected Adam AI, a B2B SaaS with agentic document-processing pipelines and a module marketplace, and delivered a full water utility system for a Philippine municipality won through competitive government bidding. Hands-on experience integrating LLMs (LlamaCloud, Gemini, OpenAI) into production — from RAG-based advisory engines to autonomous document extraction and classification. Delivered systems for clients in Australia, Switzerland, the UAE, and the United States across finance, energy, e-commerce, and professional associations. Proficient in TypeScript, SQL optimization, third-party API integration (Stripe, Xero, HubSpot), and Docker-based deployment pipelines.

Professional Experience

Full Stack Developer

Jan 2025 – Present

ClouDesk Pty. Ltd | Remote | Sydney, NSW Australia 2000

- Led backend development of MemberPulse, a multi-tenant SaaS platform serving professional associations across Australia — built CPD tracking, job boards, event management, and subscription billing modules using Symfony, PostgreSQL, and Bootstrap.
- Integrated Stripe, Xero, HubSpot, and PayPal APIs for cross-tenant payment processing, CRM synchronization, and automated invoicing.
- Built computer vision pipelines using Ultralytics YOLO to automate product classification and employee tracking for warehouse operations.
- Stabilized PG Pay, a high-value e-commerce platform for precious metals — resolved critical transaction reliability issues and payment edge cases.
- Maintained and extended educational platforms for ICOM International School (Malaysia) and a China-based internal learning system using Laravel.

Software Developer (IT Systems)

Jul 2024 – Jan 2025

EduQuest Inc. | Cagayan De Oro City, Northern Mindanao, Philippines

- Re-architected the company's LMS infrastructure using Laravel, reducing system downtime by 20% and increasing user engagement by 30%.
- Automated administrative reporting by integrating Google Sheets and Gmail APIs, eliminating 40% of manual data processing.
- Led platform onboarding for 200+ users (staff, students, parents), driving a 50% increase in LMS adoption.

Software Development Intern

Jan 2024 - May 2024

MORESCO-1 | Poblacion, Laguindingan, Misamis Oriental

- Developed features for M1-HRIS and M1-Helpdesk using Laravel and SQL Server, supporting centralized HR management and IT ticket resolution across multiple offices.
- Optimized slow-running SQL queries for employee record retrieval, reducing page load times in the HRIS dashboard.

Key Projects

Adam AI — Multi-Tenant B2B Document Intelligence SaaS

Full Stack Developer — *Switzerland-Based Client* | **Mar 2026 – Present** | *TanStack Start (React 19), TypeScript, PostgreSQL 16, Hetzner*

- Architected a module marketplace where tenants subscribe to capabilities, commission custom modules, and publish to a shared Module Store — creating a revenue-sharing ecosystem between publishers and the platform.
- Built agentic AI document-processing pipelines: email ingestion via Cloudflare Workers → AI classification → LlamaCloud extraction → field normalization → auto-matching with 8 comparison algorithms (exact, fuzzy/Levenshtein, numeric tolerance, date equality, contains, case-insensitive, common substring, last-N-chars).
- Implemented AI-powered configuration: schema auto-detection from sample documents, live extraction preview, and Gemini-driven matching rule suggestions with per-rule reasoning — reducing tenant onboarding from days to under one hour.

REPSShield — AI-Powered Real Estate Tax Compliance Platform

Full Stack Developer — *US-Based Client* | **Aug 2025 – Sep 2025** | *React 18, Node.js/Express, TypeScript, PostgreSQL 16 (Neon)*

- Engineered three AI modes: (1) agentic time-tracking with 8 tool-calling functions and confidence-based auto-approval, (2) RAG advisory over 282 IRS documents with citation-backed answers and authority ranking personalized to user tax profiles, (3) 14-check IRS examiner simulation following the Passive Activity Loss Audit Technique Guide.
- Built multi-provider AI circuit-breaker failover (SambaNova → Groq → Gemini → OpenAI → Cerebras), calendar sync (Google + Outlook), email scanning, voice transcription, and geofencing for automated location-based time logging.
- Delivered cross-platform mobile apps via Capacitor.js and a marketing site on Astro 5 / Cloudflare Pages with CI/CD via GitHub Actions and Docker.

Initao Water Billing System — Government Enterprise Platform

Full Stack Developer — *LGU-Initao* | **Feb 2026 – Present (Deployed)** | *Laravel 12, PHP 8.2+, MySQL 8,*

- *Delivered a full water utility management system handling the complete billing lifecycle: customer registration with Philippine address hierarchy, meter reading capture with photo evidence and QR code scanning, automated bill generation from configurable rate schedules, and payment processing with a double-entry accounting ledger.*
- *Built a dedicated offline-first mobile API for field meter readers using Laravel Sanctum, enabling reliable data collection in areas with limited connectivity — sync when connectivity returns.*
- *Implemented real-time WebSocket notifications via Laravel Reverb, role-based access control with audit logging (Spatie Activity Log), and analytics dashboards with Excel/PDF export for municipal reporting.*

Swiss Energy Platform Suite — Document Reconciliation & Financial Matching

System Engineer — *Petrol Tech GMBH (Swiss Petrol Station)* | **Dec 2025 – Present** | *Node.js, MongoDB*

- Consolidated 20 independent reconciliation services into a single mono-repo with 10 company-specific matching algorithms (multi-pass, delta-based, group, 3-way verification), plus 6 financial matching engines for payment terminal reconciliation across KSW, Hectronic, and Traffitec systems.

- Engineered a daily orchestration pipeline running 12 sequential matching and reporting operations, with ID-based, time-window, and amount-tolerance strategies automating reconciliation of thousands of transactions across 3 terminal systems and 4 settlement providers.
- Built an AI-powered WhatsApp document ingestion pipeline for automated classification and routing, a wholesale invoice generation system (PDF, QR bills, VAT), and a data validation pipeline across 13 RAW data sources.
- Deployed on self-hosted Hetzner VPS with PM2 process management, MongoDB state tracking, node-cron scheduling, and GitHub Actions CI/CD.

MemberPulse — Multi-Tenant SaaS CPD Platform

Lead Developer — Australia-Based Client | Feb 2025 – Aug 2025 | Symfony, PostgreSQL, Vultr

- *Designed and built a multi-tenant SaaS platform for Australian professional associations — CPD courses, events, job boards, directories, and sponsorship modules with AI-powered course generation and personalized analytics.*
- *Integrated Salesforce, Xero, Stripe, PayPal, and HubSpot APIs for cross-tenant CRM, accounting, and payment workflows with multi-tier subscription billing and recurring payments.*

PlayNow (SaaS Marketplace Platform)

Solo Developer — UAE-Based Client | Mar 2025 – Apr 2025 | Next.js, NestJS, Vercel, DigitalOcean

- Built a full-stack marketplace connecting merchants and customers through coupon-based commerce — end-to-end from NestJS API to Next.js frontend, with Stripe payment integration and merchant analytics dashboard.

Core Technical Skills

- **Backend:** Laravel, Symfony, NestJS, Node.js, C#/.NET, CodeIgniter, Python
- **Frontend:** React 19, Next.js, TanStack Start, Astro, Alpine.js, TypeScript, Tailwind CSS, shadcn/ui, Radix UI
- **Databases:** PostgreSQL 16, MySQL 8, SQL Server, Drizzle ORM, Prisma, Neon Serverless, query optimization
- **AI/ML:** Vercel AI SDK v4, LlamaCloud, Google Gemini, OpenAI API, RAG pipelines, agentic tool-calling, YOLO/Ultralytics, n8n
- **Infrastructure:** Docker, Nginx, CI/CD (GitHub Actions, Bitbucket Pipelines), Linux, PM2, Trigger.dev v4
- **Cloud:** Cloudflare (Workers, R2, Pages, Email Workers), Vercel, Vultr, Hetzner, DigitalOcean, AWS (EC2, S3)
- **Auth & Payments:** Better Auth, Laravel Sanctum, JWT, OAuth 2.0 (Google, Microsoft), Stripe, Xero, HubSpot, PayPal
- **APIs:** REST, GraphQL, WebSockets (Laravel Reverb), Google APIs, Twilio

Education

Mindanao State University – Naawan | 2024 Bachelor of Science in Information Technology, Major in Database Systems | Cum Laude

Certificates

- [Cosmic Coding with Symfony 7, Symfony 7 Fundamentals, & Doctrine, Symfony 7 & the Database](#) - *SymfonyCasts (Mar. 2025)*
- [React Basics & Advanced React – Meta](#) (*Jan. 2025*)
